## Profile

---

I am a self-motivated computer science graduate seeking to develop skills in cyber security for a challenging future career.

I have successfully combined academic studies with leading a global digital gaming magazine and recent freelance website development work. To achieve this, I work methodically with a practical approach to problem-solving, and thrive when under pressure. I have a genuine passion for computer science and cyber security, and am eager to learn more.

---

## Education

---

### Lancaster University

2014 – 2017

BSc (Hons) Computer Science      First-class Honours

- Proficient in advanced programming, advanced networking and security & risk.
- Additional modules of interest: distributed systems; internet applications engineering; software design.
- Collaborated on group project during second year to produce a functional 2D game in Java, working on both design and implementation. Contributed a majority of the code; took responsibility for integration of other modules.

### Neston High School

2006 – 2014

A Levels: Business and Economics (A), Chemistry (B), History (B)

GCSEs: 9 GCSEs (A\* - B), including English, Maths and Science

---

## Professional Experience

---

### Security Summer Intern, BT GES

June – Sept. 2016

Developed cyber security “hackathon” challenge for BT graduate recruitment. Researched common security vulnerabilities to create engaging challenges for target audience. Managed project from start to delivery, ensuring all milestones were met on time. Led project presentations and demonstrations to various BT employees, including senior management.

## Freelance Website Developer

2015 – Present

Developed WordPress-based websites for several clients worldwide, including: a clothing manufacturer, a motorbike enthusiast group and a digital marketing agency. Conducted WordPress security audits to improve website security. Organised client projects alongside academic studies, managing time accordingly to deliver all work promptly and to a high standard.

## Administrator, GuildMag.com

2012 – Present

Editor-in-Chief and administrator for a digital gaming magazine with a global audience of 20,000+ monthly views. Leading a team of 14 people from across the world to produce regular website content, a weekly podcast and digital magazines.

Designed all magazines since 2014. Represented GuildMag at Gamescom 2015; interviewed developers from game studio ArenaNet as press. Increased website traffic to highest in 3 years.

---

### Technical Skills

---

- **Languages: Java, C, Python, SQL, JavaScript, PHP, HTML/CSS.**
- Software design and development; learned through degree course and applied during group project.
- Full-stack website development, including experience with Meteor, React, WordPress, Bootstrap and Foundation.
- Ubuntu server administration; self-taught during summer internship.
- Quick learner and adaptable to new technologies.

---

### Additional Skills

---

- **Project management** – Managed projects during summer internship and second university year using Kanban methodology. Able to identify tasks and critical paths to meet deadlines and requirements.
- **Leadership** – Over 4 years of leadership experience from GuildMag. Effective use of democratic styles to lead a team of 14 people to produce regular magazine content and maintain motivation.
- **Time management** – All academic and freelance deadlines met on time. Able to prioritise and manage tasks effectively.
- **Interpersonal skills** – Able to work as part of a team, as well as lead one. Comfortable communicating with people from all backgrounds and disciplines; presented summer internship project to managerial, technical and non-technical employees to high standard and effect.
- **Self-motivation** – Naturally driven to learn more and produce the highest quality work possible.
